Professional Summary

Experienced IT systems and technology professional focused on **identifying operational problems and building simple, low-risk technical prototypes to improve workflows**. Strong background in systems support, scheduling, QA, and process documentation. Experienced working with non-technical teams in service and operational environments. Currently available to support local organizations on a volunteer basis.

Core Capabilities

- | | | |
|--------------------------------------|--|--|
| ✓ Operational Problem Analysis | ✓ Small System Prototypes & Internal Tools | ✓ Process Documentation & SOPs |
| ✓ Scheduling & Workflow Optimization | ✓ QA & Functional Validation | ✓ Collaboration with Non-Technical Teams |
| | | ✓ Product Building |

Other Technical Skills & Tools

JIRA | Confluence | Trello | SQL | PowerShell | Python | Linux | Postman | Astro | React | Wordpress

Work History

Product Owner | May 2021 – Jan 2025

Entel, Chile

- Translated operational needs into simple system requirements, prototypes, and process improvements for internal teams.
- Automated and improved HR workflows, increasing process efficiency by **40%**.
- Reduced turnaround time for needs analysis and stakeholder alignment by **30%** through structured templates, documentation, and faster validation cycles.

Senior Technical Support Engineer | May 2020 – Apr 2021

MB Solutions Latam, Chile

- Resolved production incidents and performed system validations across **Linux** and **SQL-based** platforms to maintain operational continuity.
- Built and maintained internal documentation (SOPs / KB) to improve onboarding and incident response.
- Reduced recurring tickets by **25%** through procedural automation and knowledge base optimization.

Application Development Analyst | Dec 2018 – Feb 2020

Accenture, Chile

- Built and maintained scripts/queries for data validation and process monitoring using **SQL** and **Postman**.
- Supported migration activities by testing, documenting changes, and verifying requirements with cross-functional teams.

QA Manual Tester / QA Automation Tester / Data Quality Analyst | Sep 2009 – Dec 2017

Allware, Chile

- Performed end-to-end functional validation and data quality checks to ensure system reliability across telecom platforms.
- Built structured validation documentation and evidence to improve team consistency and reduce rework during releases.
- Designed basic automated validation routines and reporting improvements, reducing critical errors by ~20% and improving traceability.
